

Power BI Project - Deep Dive Dashboard (Page 2 Guide)

Purpose: This page is designed for detailed analysis. While Page 1 answers 'what is happening', Page 2 answers 'why it is happening and where to act'.

Visual 1: Top 5 Hotels by Revenue

Why: Identify best performing properties.

Action: Focus on maintaining performance and replicating strategies.

Visual 2: Bottom 5 Hotels

Why: Identify revenue leakage.

Action: Improve pricing, marketing, or service quality.

Visual 3: Property Table

Columns: Property, City, Revenue, Occupancy, Rating.

Why: Detailed drill-down for stakeholders.

Tip: Use conditional formatting.

Visual 4: Scatter Plot (Revenue vs Rating)

Why: Understand relationship between service quality and revenue.

Insight:

Low rating + low revenue = service issue.

High rating + low revenue = pricing issue.

Visual 5: Filters (Slicers)

Add: City, Room Type, Platform.

Why: Enables focused analysis.

Final Goal: Help management identify weak properties, improve strategy, and increase revenue.
